

# SAIF UR RAHMAN

## AWS Certified Generative AI Developer Professional | Claude Certified Architect - Foundations

Lahore, Pakistan | +92 3016297433 | saifurrahman.dev.ai@gmail.com

[linkedin.com](#) | [github.com](#) | [credly.com](#) | [Dev.to](#)

---

### Professional Summary:

AWS Certified Generative AI Engineer with hands-on experience designing and deploying production-grade AI applications using AWS cloud services, Large Language Models (LLMs), and modern full-stack technologies. Experienced in building enterprise AI systems, Retrieval-Augmented Generation (RAG) pipelines, serverless architectures, AI agents, and cloud-native applications using Amazon Bedrock.

Skilled in developing scalable AI solutions, automating business workflows, integrating external APIs, and deploying secure, high-performance applications on AWS. Passionate about cloud computing, Generative AI, and building real-world AI products.

---

### Professional Experience:

#### Experts Cloud | AI Engineer

##### August 2025 – Present

- Designed and deployed enterprise Generative AI applications using Amazon Bedrock and Foundation Models (Claude & Llama).
  - Built production-ready AI solutions using serverless AWS architectures.
  - Developed scalable AI workflows for compliance automation, document intelligence, and enterprise applications.
  - Integrated AI models with cloud services, APIs, and modern web applications.
  - Developed scalable **AI automation workflows using n8n**, integrating AI agents, APIs, cloud services, and third-party platforms such as **GoHighLevel**.
- 

#### Devjour Technologies | AI Engineer

##### March 2023 – June 2025

- Designed and developed **AI-powered software solutions**, integrating machine learning and NLP technologies into real-world applications.
  - Built and deployed **intelligent automation workflows and AI solutions** to improve efficiency and streamline business processes.
- 

#### Corvit Systems Multan | Artificial Intelligence & Cloud Computing (NAVTTTC)

##### January 2025 – March 2025

- Learned AI, Machine Learning, and AWS cloud fundamentals.
  - Built foundational ML and cloud-based applications.
- 

### Featured Projects:

#### Enterprise GenAI Due Diligence & Compliance Platform

##### AWS Bedrock • Lambda • DynamoDB • Amazon S3 • API Gateway

- Built a production-grade serverless AI platform for automated due diligence, compliance analysis, and forensic report generation.
- Designed an event-driven architecture where Lambda processes requests, enriches regulatory data from DynamoDB and Amazon S3, and invokes Amazon Bedrock for AI analysis.
- Generated explainable AI-powered forensic reports with risk scoring and entity resolution.
- Automated compliance workflows and document generation using cloud-native AWS services.

---

## Claude RAG Chatbot

**Next.js • Claude (Anthropic) • LangChain • Pinecone • RAG**

- Built a **Claude-powered RAG chatbot** for knowledge-grounded conversational AI.
- Integrated **LangChain and Pinecone** for semantic document retrieval and context-aware response
- Developed a conversational AI pipeline that retrieves relevant knowledge and provides **accurate, context-aware answers** using Claude.

---

## AI-Powered Document Intelligence & RAG Platform

**AWS S3 • Amazon Textract • Amazon Bedrock • S3 Vectors • PostgreSQL • SQS • AdonisJS • Next.js**

- Built a scalable document intelligence pipeline for processing 10,000+ pages of PDFs, scanned documents, images, and unstructured files using Amazon S3 and Amazon Textract OCR.
- Developed an end-to-end RAG workflow with document classification, logical separation, intelligent chunking, embeddings, S3 Vectors, semantic search, and evidence-based retrieval.
- Integrated Amazon Bedrock for AI-powered document analysis, Q&A, summarization, cross-document reasoning, timeline generation, and automated report creation with source-level evidence traceability.

---

## PostPilot – AI Social Media Content & Publishing Platform

**Next.js • React • TypeScript • Claude • OpenAI • Gemini • Llama**

- Built an AI-powered social media platform that transforms YouTube videos, trending topics, prompts, and uploaded content into platform-specific posts.
- Integrated multiple AI models including Claude, GPT, Gemini, and Llama with automated content generation, media creation, scheduling, and publishing workflows.
- Developed a centralized dashboard for managing seven social platforms, AI-generated content, human approvals, publishing calendars, media assets, and cross-platform analytics.

---

## AI-Powered Predictive Pump Monitoring

**n8n • OpenAI • Webhooks • JSON • Gmail**

- Built an AI-powered industrial monitoring workflow that processes pump sensor data and automatically detects abnormal machine conditions.
- Implemented automated warning and critical alert workflows with conditional routing, validation, error handling, and email notifications.

---

## OmniChat – Conversational AI Assistant

**Next.js • React • TypeScript • Google Gemini**

- Built a modern conversational AI assistant with real-time streaming, multi-chat conversations, and persistent conversation history.
- Developed a modular, responsive full-stack AI application with centralized state management and an architecture ready for RAG, tool use, and agentic AI workflows.

---

## Manhattan Mental Health Counseling (MMHC) – AI Clinical Note Compliance Platform

**AWS Bedrock • Amazon S3 • AdonisJS • React • BullMQ • Redis • Google BigQuery**

- Developed an enterprise AI platform for automated clinical note auditing and healthcare compliance validation.
- Built asynchronous processing pipelines using BullMQ and Redis.
- Integrated Amazon Bedrock through Model Context Protocol (MCP) for AI-powered clinical evaluations.
- Implemented clinical note versioning, historical comparisons, and secure JSON storage using Amazon S3.
- Integrated MySQL, Google BigQuery, and external EHR systems.
- Deployed and maintained the platform on AWS using scalable cloud infrastructure.

---

## Live Avatar AI Assistant

**Next.js • Amazon Bedrock • ElevenLabs • WebRTC**

- Built an AI-powered avatar platform with real-time voice conversations.
- Integrated LLMs with ElevenLabs for speech synthesis.
- Implemented low-latency WebRTC streaming for interactive AI experiences.

---

## Serverless in different Cloud Application

**AWS Lambda • API Gateway • Amazon S3 • IAM**

- Designed and deployed a serverless backend using AWS managed services.
- Built secure REST APIs with Lambda and API Gateway.
- Implemented secure object storage using Amazon S3 and IAM.

---

## Four AI – AI-Powered Voice & Image Generation Platform

**React • Vite • Vercel • Neon PostgreSQL • Hugging Face • Web Speech API**

- Developed a production-ready full-stack AI platform for text-to-speech, AI image generation, and real-time voice transformation.
- Built secure authentication, user management, profile management, password recovery, and activity history.
- Integrated Hugging Face FLUX.1 models for AI image generation from text prompts.
- Implemented multilingual text-to-speech using the Web Speech API and real-time voice effects using the Web Audio API.
- Developed an administrator dashboard for user management and moderation.
- Built RESTful serverless APIs using Vercel Functions with Neon PostgreSQL.
- Designed a modern responsive UI using React 19, Tailwind CSS, Framer Motion, and GSAP.

---

## Technical Skills:

**Cloud (AWS):** Amazon Bedrock, EC2, Lambda, API Gateway, S3, DynamoDB, RDS, IAM, VPC, CloudFormation, CloudWatch, EventBridge, Step Functions, SNS, SQS, ECS, ECR, ElastiCache (Redis), SageMaker, Secrets Manager, Systems Manager (SSM), CloudTrail, CodeBuild, CodePipeline.

**Artificial Intelligence:** Generative AI, LLMs, Amazon Bedrock, Claude, Llama, Retrieval-Augmented Generation (RAG), AI Agents, Model Context Protocol (MCP), Prompt Engineering, AI Workflow Automation, Vector Embeddings.

**Languages:** TypeScript, JavaScript, Python, SQL.

**Frameworks:** React, Next.js, AdonisJS, Node.js, Express.js, Tailwind CSS, Vite.

**Databases:** PostgreSQL, MySQL, DynamoDB, Redis, Google BigQuery, Neon PostgreSQL.

**DevOps & Tools:** Git, GitHub, Docker, Linux (Ubuntu), REST APIs, Postman, BullMQ, Swagger/OpenAPI, Vercel.

---

## Certifications [credly.com](https://www.credly.com)

- AWS Certified Generative AI Developer – Professional
- AWS Certified Generative AI Developer - Professional Early Adopter
- Claude Certified Architect – Foundations
- Google AI Professional Certificate
- Google AI Fundamentals
- AWS Certified AI Practitioner
- AWS AI & ML Scholars – 2026 Challenge Completion
- AWS Partner: Sales Accredited - Training Badge
- AWS Partner: Technical Accredited - Training Badge
- AWS Partner – Agentic AI Technical Learning Plan

---

**Education****Bachelor of Science in Computer Science**

Government College University Faisalabad

**2021 - 2025**
